

## McKean County Recycling Program

### Scrap Metal/Junk Cars – Resources in McKean County

During Spring and Fall “Clean Ups” one issue that seems to recur is the home owner who has piles of old equipment, metal and junk cars on their property. Perhaps they “inherited” someone else’s old appliances, roofing tin, junk car etc. or perhaps they just accumulated piles over the years and do not have the physical ability, trucking or resources to clean it up. The following scrap metal dealers and salvage yards help to arrange junk car and metal clean up at camps and homes as part of their business.

Each salvage business has its own service schedule however, a “rule of thumb” is:

Dealers will not pay for hauling tin, but will remove it, usually at zero cost. Dealers may pay for other metals such as copper and brass. They may also pay the owner a few dollars for vehicles 1995 or newer which have a clear title, while they may offer to haul for little or no dollars vehicles older than 1995 which again, have a clear title.

All refrigeration coolants or freon **must** be removed from all appliances by an authorized technician and have a removal tag attached!

**To arrange/ negotiate a clean up, owners should provide the dealer with a general inventory so the dealer knows what kind of hauling equipment and manpower is needed. A site map and pictures, if possible, are always helpful.**
